The Description

ARENA OBJECTIVES
Key Challenge Areas

VICTORY CONDITION
The Goal

SMART MONITORING & ALERT SYSTEM FOR COLD STORAGE AND INDUSTRIAL WORKFORCES

SPONSOR • SPAZOR LABS

IOT

COMPUTER VISION

SAFETY

◆ THE ARENA BRIEF

Develop a smart monitoring and alert system for cold-storage facilities or industrial workplaces that can continuously monitor environmental conditions, equipment status, and workforce-related safety parameters. Participants can use IoT sensors, CCTV/computer vision, or a combination of both to detect abnormal conditions, unsafe situations, restricted-area access, PPE compliance, equipment issues, or other operational risks. An integrated solution can combine sensor and visual data to provide a comprehensive real-time view of the facility and support timely intervention.

◆ ARENA OBJECTIVES

◆ IoT-based environmental and equipment monitoring

◆ CCTV/computer-vision-based workforce and safety monitoring

◆ Real-time anomaly and incident detection

◆ Automated alerts and notifications

◆ Centralized monitoring dashboard

◆ Historical data and analytics

◆ Integration of IoT and CCTV data

VICTORY CONDITION

Build a scalable smart-monitoring solution that detects abnormal conditions and potential safety or operational risks in real time and alerts the appropriate personnel for timely action.

PROJECT PORTFOLIO MANAGEMENT & RISK MONITORING PLATFORM FOR FIRE AND RESCUE OPERATIONS

SPONSOR • SPAZOR LABS

PORTFOLIO MGMT

RISK ANALYTICS

SLA

◆ THE ARENA BRIEF

Develop a Project Portfolio Management (PPM) platform for a fire and rescue organization to manage multiple projects, track their progress, identify risks, and provide management with a consolidated view of portfolio performance. The platform should help teams monitor project status, milestones, deadlines, dependencies, risks, resources, SLAs, and deliverables, while identifying projects at risk of delay or failure and SLAs approaching breach so that management can act proactively.

◆ ARENA OBJECTIVES

◆ Centralized project and portfolio management

◆ Project health and risk monitoring

◆ SLA tracking and breach prediction

◆ Milestone and deadline tracking

◆ Resource and dependency management

◆ Automated alerts and escalation

◆ Executive dashboards and portfolio reporting

◆ AI/analytics-based risk identification

VICTORY CONDITION

Create a unified platform that gives decision-makers a real-time view of their project portfolio and helps identify potential issues before they become critical.

AI-POWERED LEAD GENERATION, QUALIFICATION & SALES AUTOMATION PLATFORM

SPONSOR • SPAZOR LABS

AGENTIC AI

SALES AUTOMATION

RAG

◆ THE ARENA BRIEF

Develop an AI-powered sales intelligence and lead automation platform that can identify potential customers, research companies and decision-makers, qualify leads, prepare personalized outreach, and track opportunities through the sales lifecycle. The system should support Ideal Customer Profile (ICP) identification, company and decision-maker discovery, automated research, personalized email drafts, and a configurable three-step follow-up strategy. Advanced solutions may explore agentic AI, RAG-based organizational knowledge, CRM integration, and AI-driven opportunity scoring.

◆ ARENA OBJECTIVES

◆ ICP identification and lead discovery

◆ Company and decision-maker identification

◆ Automated company/person research

◆ AI-powered lead qualification

◆ Personalized email generation

◆ Automated three-step outreach and follow-up

◆ Lead engagement and lifecycle tracking

◆ AI-based opportunity/conversion scoring

◆ Agentic AI workflows

◆ RAG-based knowledge base

◆ CRM integration

◆ Sales pipeline and analytics dashboard

VICTORY CONDITION

Build an intelligent sales automation system that reduces manual prospecting effort while helping sales teams prioritize and act on leads with the highest potential.

AI-NATIVE EDUCATION OS FOR INTELLIGENT DOUBT RESOLUTION

SPONSOR • ATOMTALK

EDTECH

AI AGENTS

RAG

◆ THE ARENA BRIEF

Build an AI-powered education platform that helps students receive the right assistance for their doubts at the right time. The system should understand a student's question, context, and learning history and determine whether the student should receive an AI-generated explanation, personalized practice, or assistance from a relevant human teacher through a live or one-to-one interaction. Solutions may explore personalized doubt solving, learner profiles, intelligent teacher matching, adaptive practice, AI agents, and systems that learn from previous student-teacher interactions.

◆ ARENA OBJECTIVES

◆ AI-powered doubt understanding and resolution

◆ Personalized learner profiling

◆ Intelligent decision-making and AI agent orchestration

◆ AI-based teacher discovery and matching

◆ Live and one-to-one teacher interaction

◆ Adaptive practice and assessment

◆ Learning from previous student interactions

◆ RAG-based interaction with student study material

◆ Student progress and learning analytics

VICTORY CONDITION

Build an intelligent education system that understands what a student needs, determines the appropriate form of assistance, and connects AI and human expertise to improve the learning experience.

AI-NATIVE EMR FOR INTELLIGENT CLINICAL ASSISTANCE

SPONSOR • QUALACS-I

HEALTHTECH

CLINICAL AI

OCR

◆ THE ARENA BRIEF

Develop an AI-powered Electronic Medical Record platform that helps healthcare professionals capture, organize, understand, and retrieve patient information efficiently. The system can work with clinical conversations, medical documents, patient history, laboratory reports, prescriptions, and other medical information to generate structured records and provide relevant information when required. Solutions may explore AI-assisted clinical documentation, medical document understanding, intelligent patient timelines, natural-language search, clinical trend analysis, medication and record consistency checks, and evidence-backed patient summaries while keeping clinicians responsible for reviewing and approving AI-generated information.

◆ ARENA OBJECTIVES

◆ AI-assisted clinical documentation and medical scribing

◆ Medical document and OCR-based information extraction

◆ Intelligent patient history and timeline generation

◆ Natural-language search across medical records

◆ Patient data summarization

◆ Clinical and laboratory trend analysis

◆ Medication and record consistency detection

◆ Evidence-backed AI responses

◆ Role-based access and auditability

◆ AI-assisted healthcare workflow automation

VICTORY CONDITION

Build an intelligent EMR solution that reduces administrative burden and enables healthcare professionals to access relevant patient information faster while maintaining human clinical oversight.

INTELLIGENT BUSINESS OPERATIONS & CUSTOMER ENGAGEMENT

SPONSOR • ALTYGEN BIOPHARM

ENTERPRISE OPS

AUTOMATION

ANALYTICS

◆ THE ARENA BRIEF

Build a smart and scalable business management platform that intelligently leverages organizational and customer data to streamline day-to-day operations, automate routine processes, and identify actionable business opportunities. The solution should help organizations improve operational efficiency, strengthen and personalize customer relationships, enhance coordination across teams, and provide meaningful visibility into ongoing business activities. It should enable timely, data-driven decisions, proactive responses to customer and operational needs, and reduced dependency on repetitive manual processes.

◆ ARENA OBJECTIVES

◆ Intelligent business process automation

◆ Customer data analysis and personalization

◆ Identification of actionable business opportunities

◆ Automated task and workflow management

◆ Customer engagement and relationship management

◆ Cross-team coordination and information sharing

◆ Business activity monitoring and analytics

◆ Proactive alerts and recommendations

◆ AI-powered decision support

◆ Scalable business dashboards

VICTORY CONDITION

Build an intelligent business operations platform that turns organizational and customer data into actionable insights and automated workflows, helping businesses operate efficiently, respond proactively, and make better data-driven decisions.
